Rosamond Gifford Zoo Primate Exhibit

Project Description: The Rosamond Gifford Zoo Primate Exhibit project is one of 5 projects constructed in partnership between the Save the Rain Program at the Rosamond Gifford Zoo since 2009. Other projects completed, or under construction at the Zoo include a green roof on the new elephant exhibit barn, installation of bioretention areas adjacent to Conservation Place and Wilbur Avenue, installation of porous pavements and a tree trench in the parking lots, and a stormwater wetland and cistern system.

This project consisted of flexible porous pavement in the courtyard area, and rain gardens installed adjacent to the Primate Exhibit. These technologies not only enhance the physical appearance of the site, but provide significant environmental benefits, capturing approximately 863,000 gallons of stormwater annually.

Project:	Rosamond Gifford Zoo Primate Exhibit
Project Owner:	Onondaga County
Project Location:	1 Conservation Place
Sewershed:	Harbor Brook
GI Technology:	Rain Garden, Porous Pavement
Capture Area:	16,500 sq. ft.
Runoff Reduction:	863,000 gal/yr
Year Contracted:	2010
Cost:	\$25,000
Prime Contractor:	Bette & Cring
