

FACT SHEET

Avery Ave Park Greening – Pass Arboretum

Project:	Avery Ave (Pass Arboretum)
Project Owner:	Syracuse Parks Dept.
Project Location:	Avery Ave. between Tompkins St. & Bryant St.
Sewershed:	Harbor Brook
GI Technology:	Rain Gardens
Capture Area:	39,000 sq. ft.
Run-off Reduction:	746,000 gal/yr
Year Constructed	2011
Construction Cost:	\$316,420
Prime Contractor:	Economy Paving

Project Description: The Avery Ave Pass Arboretum Project is one of many collaborations of Onondaga County Save the Rain and the City of Syracuse Parks Department. The project involves the installation of 11,000 square feet of rain gardens along the east side (Avery Ave.) of the park. The location is ideal for educational opportunities with walkways for pedestrian traffic woven into the footprint.

This project was designed with consideration for historic preservation and was approved by the City of Syracuse Landmark Preservation Board. The new plantings in Pass Arboretum were chosen according to the vegetation historically found in this park.
