

## FACT SHEET Westcott Community Center

**Project Description:** The Westcott Community Center project is part of a larger 2012 Save the Rain initiative involving both County- and City-owned parks located within the combined sewershed.

The project consisted of retrofitting an existing plaza area adjacent to the community center by removing the existing compacted soils and installing new porous pavers. The porous pavers and associated infiltration bed were designed to handle runoff from the roof of the building as well as from Westcott Street. Additionally, two new rain barrels were installed in the rear of the building to capture runoff from a small portion of the roof. In total, this project captures 153,000 gallons of stormwater runoff annually.

Project:	Westcott Community Center
Project Owner:	City of Syracuse Parks Dept.
Project Location:	822 Euclid Ave.
Sewershed:	Clinton/Lower MIS
GI Technology:	Porous Pavers, Rain Barrel
Capture Area:	9,000 sq. ft.
Runoff Reduction:	153,000 gal/yr
Year Contracted:	2012
Construction Cost:	\$52,500
Bid Date:	04/30/12
Prime Contractor:	Ballard Construction
