Suburban Green Infrastructure: Town of Lysander Tree Planting Manhole Repair, Pipe Lining, Project

Project Description: The Town of Lysander is proposing an innovative and green project including pipe lining, manhole repair and tree planting.

The town plans to slip line sewer mains with cured in place pipe (CIPP) and epoxy coat 23 manholes included in the Indian Springs Manor sanitary sewer.

In addition to the gray improvements, the town proposes to plant 42 additional street trees within the right-of-way.
